SUMMARY

Information Systems graduate with hands-on experience in system analysis, business process modeling, and system documentation through internship and project-based work. Experienced in supporting system development lifecycle, including requirement gathering, UAT/SIT, and reporting systems. Passionate about bridging business needs with technical solutions and continuously developing skills as a System Analyst.

EDUCATION

Telkom University – Surabaya Campus | 2021 - 2025

Undergraduate of Information System | GPA: 3.73/4.00

Thesis: Development of a Web-Based Inventory Management System Using The Extreme Programming Method at The East Java Provincial Social Service Office

EXPERIENCE

PT Sistem Informatika Semen Indonesia

MagangHub (Technical Writer [System Analyst Support])

Nov 2025 – Present

- Developed system documentation including Project Charter, Blueprint, and Technical Specifications.
- Conducted business requirement discussions with stakeholders to define system needs.
- Produced 10+ Minutes of Meeting (MoM).
- Managed project documentation (Issue Log, Change Request, BAPP).
- Delivered user training and developed user guides to support system adoption.
- Performed business process analysis to support system requirement definition.
- **Tools and Methods:** IT Service Management (ITIL-based workflow), ClickUp, Microsoft Excel, Microsoft Word

Dinas Sosial Provinsi Jawa Timur

Internship (Web Developer)

Jul – Sep 2024

- Boosted inventory tracking accuracy by developing a web-based Inventory Management Information System using the Laravel framework.
- Reduced manual data entry errors by 30% through the implementation of automated reporting features and robust MySQL database validation.
- Conducted requirement analysis (Use Case, BPMN, ERD) and developed core features (stock in/out, reporting).
- **Technologies:** PHP, MySQL, Laravel, Tailwind CSS, Scrum Framework, Draw.io.

PT. Insan Sejahtera Engineering (ISE)

Internship (Odoo Engineer Intern)

Feb – Jul 2024

- Optimized production monitoring efficiency by developing a custom app using Microsoft Power Apps, achieving 100% integration with SQL Server and PLC data.
- Enhanced company portfolio quality by compiling comprehensive technical documentation for system demonstrations offered to international clients.
- Simulated Odoo ERP integration for 4 core modules (Inventory, Purchase, Manufacturing, Sales), streamlining manufacturing workflows for real industry case studies.
- **Technologies:** Odoo ERP, Power Platform (Power Apps, Power Automate, Power BI), SQL Server, PLC Integration.

MSIB Kampus Merdeka

Studi Independen Data Analyst for Business

Mar – May 2024

- Analyzed 6 years of shrimp export-import data (2018–2024) to identify seasonal demand trends and top market exporters with high precision.
- Delivered data-driven business recommendations using Tableau visualizations to optimize logistics efficiency and market diversification strategies.
- **Tools and Methods:** Data visualization (Tableau), Market and Demand Forecasting, Business Analysis.

TECHNICAL PROJECT

EnamBelas Persada Indonesia – Tally Reporting System

Feb 2026 – Present

- Supported development of Tally Reporting System by analyzing business workflow and user needs.
- Analyzed business processes involving multi-role users (Operation Executive, Surveyor, Manager, Client, Finance).
- Coordinated with stakeholders to gather reporting and financial requirements.
- Contributed to system flow design including survey process, reporting dashboard, and finance tracking.
- Supported finance module development (invoice, advance, reimbursement, and receipt management).

- Ensured accuracy of reporting data for operational and financial use.
- **Technologies:** Blade Templating, PHP, Laravel, MVC Architecture.

Litera – Digital Publishing Platform (Version 2.0 Update)

Jan 2026 – Feb 2026

- Improved UI/UX based on system evaluation and user flow optimization
- Developed and scaled a digital publishing platform that enables seamless story submission and standardized editorial workflows for quality control.
- Spearheaded the Version 2.0 series (v2.1 & v2.2), focusing on system optimization, bug fixing, and enhanced mobile-web integration.
- Conducted thorough system testing and documentation for each version update to maintain platform stability and facilitate future development.
- **Technologies:** PHP, Laravel, Tailwind CSS, JavaScript, MVC Architecture, React Native (mobile).

Litera – Digital Book Website & Mobile App

Aug 2024 – Oct 2025

- Developed a digital publishing platform enabling users to read and submit stories, with an editorial workflow to standardize and improve content quality.
- Implemented role-based access control for readers, writers, and editors to streamline content management.
- Designed UI/UX and created basic wireframes for user interface flow.
- **Technologies:** PHP, Laravel, Tailwind CSS, JavaScript, MVC Architecture, React Native (mobile).

Careventory – Inventory Management System

Jul – Sep 2024

- Developed integrated inventory management system with digital transaction logging.
- Improved tracking accuracy and reduced manual errors.
- **Technologies:** Laravel, TailwindCSS, JavaScript, PHP.

CoE Dashboard Telkom University

Jun – Jul 2024

- Building and developing a Center of Excellence (CoE) portal website and research information for Telkom University National Campus, including architectural design, content management, and feature integration.
- **Technologies:** PHP, Tailwind CSS, Laravel, JavaScript.

SKILL AND CERTIFICATION

System Analysis	: Use Case Diagram, BPMN, ERD, Business Process Modelling, Requirement Gathering
Backend and API	: Laravel, REST API
Database	: MySQL, SQL Server, PostgreSQL
Programming	: Python, JavaScript, React.js, Next.js, Laravel, Bootstrap, Tailwind CSS
Data Analysis	: SPSS, Google Colab (Python), Tableau, Power BI
System Testing	: Unit Testing, Functional Testing, User Acceptance Testing (UAT), System Integration Testing (SIT)
Tools	: Draw.io, Visual Paradigm, Odoo ERP
Languages	: Indonesian (Native), English (Intermediate)
Certification	: SCM100 – Business Process in Planning

PROJECTS AND INTELLECTUAL PROPERTY

- **Smart Village: A Conceptual Maturity Framework (SVM Framework Design)**
This research is a collaborative project between universities and Telkom University Bandung. The Telkom Institute of Technology Surabaya research team continued the study from Telkom University, developing the Smart Village Maturity (SVM) Framework. The framework is used to assess villages based on their IDM (Indeks Desa Membangun) values.
- **Conceptual Model of IT Strategy Implementation for Smart Village in the Society 5.0 Era (IPR)**
This copyright presents a conceptual model for implementing IT strategies in Smart Villages during the Society 5.0 era, based on four strategic goals: information management, ICT application, internet access, and innovation technology.
- **Analysis of Digital Fraud Modus using BPMN (Published Paper) | 2023**
This study analyzes phishing fraud patterns using BPMN to identify system vulnerabilities and user interaction flows. The findings were presented at the National Seminar of Information Systems (SENASIF).
- **Careventory – Consumable Inventory Management System (Web-Based, IPR)**
This computer program copyright presents a web-based inventory management system designed for tracking consumable items. The system features digital transaction logging and reporting to optimize business processes and reduce manual errors.
