SUMMARY

Information Systems graduate with hands-on experience in manual software testing across the full Software Testing Life Cycle (STLC) - requirement analysis, test planning, test case development, environment setup, test execution, and test cycle closure - for web and mobile applications. Skilled in functional, regression, and exploratory testing, along with clear bug reporting and validation. Detail-oriented with strong documentation habits and an agile mindset, comfortable collaborating with developers and stakeholders to ensure software quality.

EDUCATION

Telkom University – Surabaya Campus | 2021 - 2025

Bachelor's degree in information systems | GPA: 3.73/4.00

- Thesis: Development of a Web-Based Inventory Management System Using The Extreme Programming Method at The East Java Provincial Social Service Office

EXPERIENCE

PT Sistem Informatika Semen Indonesia | Nov 2025 – May 2026

Internship - Technical Writer (QA Support)

- Prepared SIT and UAT documentation, test scenarios, and supporting system documents for application implementation.
- Executed System Integration Testing (SIT), User Acceptance Testing (UAT), and Regression Testing after bug fixes and feature enhancements.
- Documented testing results, validated reported issues, and collaborated with developers during debugging and deployment.
- Managed project documentation including Issue Logs, Change Requests, and Minutes of Meeting (MoM), ensuring consistent traceability.
- Tools and Methods:** IT Service Management (ITIL-based workflow), ClickUp, Microsoft Excel, Microsoft Word

Dinas Sosial Provinsi Jawa Timur | Jul – Sep 2024

Internship - Web Developer

- Created system analysis artifacts (Use Case, BPMN, ERD) to support development and testing activities.
- Conducted functional testing and validation to ensure system features met user requirements.
- Reduced manual data entry errors by 30% through automated reporting features and database validation.
- Technologies:** PHP, MySQL, Laravel, Tailwind CSS, Scrum Framework, Draw.io.

PT. Insan Sejahtera Engineering (ISE) | Feb – Jul 2024

Internship - Odoo Engineer

- Participated in testing and validation of system functionality to ensure data accuracy and workflow consistency.
- Simulated Odoo ERP integration across 4 core modules (Inventory, Purchase, Manufacturing, Sales) for real industry case studies.
- Technologies:** Odoo ERP, Power Platform, SQL Server, PLC Integration.

TECHNICAL PROJECT

Litera – Digital Publishing Platform (Version 1 - 3) | Aug 2024 – Present

Web Developer and Manual QA

- Designed and executed Functional, SIT, UAT, and Regression Testing for newly developed features and bug fixes across 10+ system modules.
- Created test scenarios and test cases and conducted exploratory testing to identify edge-case defects beyond scripted scenarios.
- Documented software defects and collaborated with developers to verify and validate fixes.
- Performed post-deployment validation after migration to an Ubuntu VPS environment to ensure application stability

TernakPark - Farm Management Information System (FMIS) | May 2026 – Present

Web Developer and Manual QA

- Built role-based admin modules (Livestock, Pens, Feed, Investor Management, Staff, Master Data, Excel Import) using PHP, Laravel, JavaScript, and MySQL.
- Conducted functional testing and feature validation to ensure business workflows operated correctly.
- Created test cases and bug reports to document and track testing results across features.
- Tested Excel workbook import and data validation rules to catch bulk data migration errors before release.

EnamBelas Persada Indonesia – Tally Reporting System | Feb 2026 – Present

Web Developer and Manual QA

- Built application workflows using Blade Templating, PHP, Laravel, and MVC architecture based on stakeholder requirements.
- Assisted functional testing and validation to ensure financial reports matched business requirements across multi-role

workflows.

Careventory – Inventory Management System | Jul – Sep 2024

Web Developer and Manual QA

- Designed system architecture (Use Case, BPMN, ERD) and coded a web-based inventory management system using Laravel, PHP, and MySQL.
- Conducted functional, usability, and validation testing to ensure system reliability and compliance with user requirements.
- Improved tracking accuracy and reduced manual errors through thorough pre-release testing.

SKILL AND CERTIFICATION

Software Testing	: Manual Testing, Functional Testing, Regression Testing, Exploratory Testing, SIT, UAT, Test Case & Scenario Design, Bug Reporting & Validation, STLC
API Testing	: Postman, Swagger
System Analysis	: Use Case Diagram, BPMN, ERD, Requirement Gathering
Programming	: PHP, JavaScript, Python
Database	: MySQL, SQL Server, PostgreSQL
Tools	: Draw.io, Visual Paradigm, ClickUp
Languages	: Indonesian (Native), English (Intermediate)
Certification	: SCM100 – Business Process in Planning
Soft Skills	: Attention to detail, clear documentation, communication and teamwork

PROJECTS AND INTELLECTUAL PROPERTY

- **Careventory – Consumable Inventory Management System (Web-Based, IPR)**
This computer program copyright presents a web-based inventory management system designed for tracking consumable items. The system features digital transaction logging and reporting to optimize business processes and reduce manual errors.
- **Analysis of Digital Fraud Modus using BPMN (Published Paper, 2023) — dipresentasikan di SENASIF (National Seminar of Information Systems)**
