SUMMARY

Information Systems graduate and Technical Writer with hands-on experience producing BRD, User Manuals, and API documentation across the software development lifecycle. Skilled at translating complex technical concepts into clear, user-friendly documentation for both technical and non-technical audiences, and at collaborating with Developers, QA Engineers, and stakeholders to keep documentation accurate and version controlled.

EDUCATION

Telkom University – Surabaya Campus | 2021 - 2025

Bachelor's Degree in Information System | GPA: 3.73/4.00

- Thesis: Development of A Web-based Consumable Inventory Management System Using The Extreme Programming Method at The East Java Provincial Social Service Office

EXPERIENCE

PT Sistem Informatika Semen Indonesia

Internship (Technical Writer) | Nov 2025 – May 2026

- Developed 20+ Project Charters, Blueprints, Technical Specifications, and User Guides to standardize documentation across software development projects.
- Facilitated business requirement discussions with cross-functional stakeholders, translating findings into technical specifications for 2 concurrent projects.
- Produced 15+ MoM documents, capturing stakeholder decisions and action items to improve cross-team communication and traceability.
- Managed Issue Logs, Change Requests, BAPP, and deployment reports, ensuring 100% document consistency and traceability throughout the project lifecycle.
- Conducted user training sessions and led system handovers, supporting successful application adoption across end-user teams.
- **Tools and Methods:** IT Service Management (ITIL-based workflow), ClickUp, Microsoft Office (Word and Excel).

Dinas Sosial Provinsi Jawa Timur

Internship (Web Developer) | Jul – Sep 2024

- Built a web-based Inventory Management Information System using Laravel, boosting inventory tracking accuracy for provincial operations.
- Reduced manual data entry errors by 30% through automated reporting features and robust MySQL validation.
- Authored system analysis documentation including Use Cases, BPMN diagrams, ERD, and functional specifications to guide application development.
- **Technologies:** PHP, MySQL, Laravel, Tailwind CSS, Scrum Framework, Draw.io.

PT. Insan Sejahtera Engineering (ISE)

Internship (Odoo Engineer Intern) | Feb – Jul 2024

- Developed a production-monitoring application using Microsoft Power Apps, achieving full (100%) integration with SQL Server and PLC data.
- Compiled comprehensive technical documentation for system demonstrations, enhancing portfolio quality for international clients.
- Simulated Odoo ERP integration across 4 core modules (Inventory, Purchase, Manufacturing, Sales) for real industry case studies.
- **Technologies:** Odoo ERP, Power Platform (Power Apps, Power Automate, Power BI), SQL Server, PLC Integration.

MSIB Kampus Merdeka

Independent Study (Data Analyst for Business) | Mar – May 2024

- Analyzed 6 years of shrimp export-import data (2018–2024) to identify seasonal demand trends and top market exporters with high precision.
- Delivered data-driven business recommendations using Tableau visualizations to optimize logistics efficiency and market diversification strategies.
- **Tools and Methods:** Data visualization (Tableau), Market and Demand Forecasting, Business Analysis.

TECHNICAL PROJECT

EnamBelas Persada Indonesia – Tally Reporting System | Feb 2026 – Jul 2026

- Analyzed operational and financial business processes involving Operation Executive, Surveyor, Manager, Finance, and Clients to identify system requirements.
- Collaborated with stakeholders to translate business needs into functional specifications and application workflows.
- Developed comprehensive User Guides to support end-user training and ensure successful system adoption across

different user roles.

- Documented business workflows, reporting processes, and feature specifications to improve documentation consistency throughout the project lifecycle.
- Contributed to reporting dashboard design and documentation updates during feature enhancements and system implementation.
- **Technologies:** Blade Templating, PHP, Laravel, MVC Architecture, Swagger

Litera – Digital Publishing Platform (Version 1–3) | Aug 2024 – Present

- Developed and maintained documentation for a digital publishing platform supporting multiple software releases (Version 1–3).
- Documented business workflows, feature specifications, and system modules including Dashboard, User Management, Ticket Management, Payroll, Contract Management, Contest Management, Books Management, Marketing Campaigns, Push Notifications, and Maintenance Mode.
- Collaborated with developers and stakeholders during feature planning, requirement clarification, testing, deployment, and production support.
- Supported REST API integration and prepared supporting technical references for developers and stakeholders.
- Assisted deployment activities during migration from shared hosting to an Ubuntu VPS environment and documented post-deployment issues for troubleshooting.
- **Technologies:** PHP, Laravel, JavaScript, Tailwind CSS, React Native, REST API, MySQL, Git, Ubuntu VPS.

TernakPark – Farm Management Information System (FMIS) | May 2026 – Present

- Gathered and analyzed business requirements with stakeholders to define operational workflows for livestock, investor, and subscription management.
- Prepared functional documentation and business process descriptions for multi-role modules including Admin, Partner (Mitra), and Investor.
- Documented Excel workbook imports workflows, validation rules, and bulk data migration processes to support operational efficiency.
- Collaborated with developers during feature implementation, requirement clarification, and documentation updates throughout the development lifecycle.
- Produced supporting system documentation for role-based access, reporting modules, and operational workflows.
- Prepared API documentation using Swagger to support backend integration and developer collaboration.
- **Technologies:** PHP, Laravel, JavaScript, Tailwind CSS, MySQL

Careventory – Inventory Management System V1 and V2 | Jul – Oct 2024

- Analyzed inventory management business processes and translated user requirements into system documentation.
- Designed Use Case Diagrams, BPMN, ERD, and functional specifications to support application development.
- Developed a web-based inventory management system to digitize inventory transactions and reporting processes.
- Prepared a comprehensive User Guide and delivered system handover sessions training.
- Validated implemented features to ensure compliance with business requirements before deployment.
- **Technologies:** Laravel, PHP, JavaScript, Tailwind CSS, MySQL

SKILL AND CERTIFICATION

DBMS/ Database : MySQL, PostgreSQL, SQL Server

Programming Language: PHP, JavaScript, Python

Framework Libraries : Laravel, React.js, Next.js, Bootstrap, Tailwind CSS

System Testing : SIT, UAT, Functional Testing

System Analysis : Requirement Gathering, BPMN, Use Case Diagram, ERD

Documentation Tools : Microsoft Word, Notion, ClickUp, Swagger

Diagram Tools : Draw.io, Visual Paradigm

Languages : Indonesian (Native), English (Intermediate)

Certification : SCM100 – Business Process in Planning

PUBLICATION AND INTELLECTUAL PROPERTY

- Analysis of Digital Fraud Modus using BPMN (Published Paper) | 2023
- Careventory – Consumable Inventory Management System (Web-Based, IPR)
