SUMMARY

Information Systems graduate with experience in business requirement gathering, process analysis, and system documentation across enterprise and web application projects. Prepared system blueprints, technical specifications, and project records while coordinating with stakeholders to clarify requirements. Also experienced in functional testing, SIT/UAT support, and reviewing application changes against business rules.

EDUCATION

Telkom University – Surabaya Campus | 2021 - 2025

Bachelor of Information Systems | GPA: 3.73/4.00

Thesis: Development of a Web-Based Inventory Management System Using The Extreme Programming Method at The East Java Provincial Social Service Office

EXPERIENCE

PT Sistem Informatika Semen Indonesia

Technical Writer – MagangHub Batch 2 | Nov 2025 – Jul 2026

- Gathered and clarified business requirements with stakeholders across two concurrent projects.
- Prepared system documentation, including Project Charters, Blueprints, Technical Specifications, and User Guides.
- Managed project documentation, including Issue Logs, Change Requests, and deployment reports.
- Analyzed business processes and translated requirements into structured system documentation.
- Supported user adoption through documentation and user training.
- **Tools:** ClickUp, Microsoft Word, Microsoft Excel

Dinas Sosial Provinsi Jawa Timur

Internship (Web Developer) | Jul – Sep 2024

- Boosted inventory tracking accuracy by developing a web-based Inventory Management Information System using the Laravel framework.
- Reduced manual data entry errors by 30% through the implementation of automated reporting features and robust MySQL database validation.
- Conducted requirement analysis (Use Case, BPMN, ERD) and developed core features (stock in/out, reporting).
- **Technologies:** PHP, MySQL, Laravel, Tailwind CSS, Scrum Framework, Draw.io.

PT. Insan Sejahtera Engineering (ISE)

Internship (Odoo Engineer Intern) | Feb – Jul 2024

- - Developed a custom production monitoring application using Microsoft Power Apps, successfully integrating SQL Server and PLC data.
- Enhanced company portfolio quality by compiling comprehensive technical documentation for system demonstrations offered to international clients.
- Simulated Odoo ERP integration for 4 core modules (Inventory, Purchase, Manufacturing, Sales), streamlining manufacturing workflows for real industry case studies.
- **Technologies:** Odoo ERP, Power Platform (Power Apps, Power Automate, Power BI), SQL Server, PLC Integration.

MSIB Kampus Merdeka

Studi Independen Data Analyst for Business | Mar – May 2024

- Analyzed shrimp export-import data from 2018–2024 to identify seasonal demand trends and leading exporters.
- Presented data-driven business recommendations using Tableau visualizations to support logistics efficiency and market diversification strategies.
- **Tools and Methods:** Data visualization (Tableau), Market and Demand Forecasting, Business Analysis.

PROJECTS

TutorPintar – Tryout Platform | May 2026 – Present

- Defined feature scope and release priorities with the client for current and planned platform enhancements.
- Reviewed the student dashboard's scoring logic and identified UI and navigation issues in the dashboard and tryout listing.
- Implemented targeted updates in Laravel Blade views and verified responsive behavior across desktop and mobile screens while preserving existing business logic.
- **Technologies:** PHP, Laravel, Blade, Tailwind CSS, JavaScript, MySQL, Git

TernakPark – Farm Management Information System | May 2026 – Aug 2026

- Gathered and analyzed business requirements and user feedback to identify system enhancements and new features.
- Implemented role-based access control (RBAC) for Administrators, Partners, and Investors, with dedicated dashboards and operational workflows.
- Developed and enhanced modules supporting livestock management, farm operations, investor management, and business reporting.
- **Technologies:** PHP, Tailwind CSS, Laravel, JavaScript

Litera – Digital Publishing Platform | Aug 2024 – Jun 2026

- Developed and maintained a digital publishing platform supporting story submission, editorial workflows, and content management.
- Implemented and enhanced role-based features for administrators, editors, writers, and readers across multiple releases.
- Supported feature updates, bug fixing, and post-deployment validation during platform maintenance and version upgrades.
- Assisted with deployment and troubleshooting during migration from shared hosting to an Ubuntu-based VPS.
- **Technologies:** PHP, Laravel, Tailwind CSS, JavaScript, MVC Architecture, React Native (mobile).

EnamBelas Persada Indonesia – Tally Reporting System | Feb 2026 – Jul 2026

- Reviewed finance workflows covering invoices, advances, reimbursements, and receipts to support functional implementation.
- Developed Finance module features for invoice, advance, reimbursement, and receipt management.
- Tested Finance workflows, including Surveyor-related processes used within finance operations.
- Documented test findings and compared actual results against expected behavior to support issue resolution.
- **Technologies:** PHP, Laravel, Blade, MySQL

Careventory – Inventory Management System | Jul – Sep 2024

- Digitized inventory tracking and transaction recording by developing a web-based Inventory Management Information System using Laravel.
- Implemented automated reporting and MySQL database validation to reduce manual data entry errors.
- Conducted requirements analysis using Use Case Diagrams, BPMN, and ERD, and developed core features for stock-in, stock-out, and reporting.
- **Technologies:** Laravel, Tailwind CSS, JavaScript, PHP.

TECHNICAL SKILLS

System Analysis	: Requirements Gathering, Business Process Modeling, Use Case Diagram, BPMN, ERD
Documentation	: Project Charter, Blueprint, Technical Specifications, User Guides, Issue Log, Change Requests
Testing	: Functional Testing, SIT, UAT, Regression Testing, Bug Reporting
Technical	**:** Laravel, PHP, REST API, MySQL, SQL Server
Tools	: ClickUp, Draw.io, Visual Paradigm, Microsoft Office
Languages	**:** Indonesian (Native), English (Intermediate/B2)

PROJECTS AND INTELLECTUAL PROPERTY

- **Smart Village: A Conceptual Maturity Framework (SVM Framework Design)**
  This research is a collaborative project between universities and Telkom University Bandung. The Telkom Institute of Technology Surabaya research team continued the study from Telkom University, developing the Smart Village Maturity (SVM) Framework. The framework is used to assess villages based on their IDM (Indeks Desa Membangun) values.
- **Conceptual Model of IT Strategy Implementation for Smart Village in the Society 5.0 Era (IPR)**
  This copyright presents a conceptual model for implementing IT strategies in Smart Villages during the Society 5.0 era, based on four strategic goals: information management, ICT application, internet access, and innovation technology.
- **Analysis of Digital Fraud Modus using BPMN (Published Paper) | 2023**
  This study analyzes phishing fraud patterns using BPMN to identify system vulnerabilities and user interaction flows. The findings were presented at the National Seminar of Information Systems (SENASIF).
- **Careventory – Consumable Inventory Management System (Web-Based, IPR)**
  This computer program copyright presents a web-based inventory management system designed for tracking consumable items. The system features digital transaction logging and reporting to optimize business processes and reduce manual errors.
